

New Developments:

- Made all images correct pixels and jpegs to fix layout
- Created my own web pages to link to for the “My Work” page to replace the links I had that lead off my website
- Made more fitting additions to hovers in css
- Created and integrated a logo
- Downloaded and Used a font from google fonts
- Made intro/headings for each page
- Corrected Email link on Contact page
- Made Responsive layout adjustments using
 - `font-size: clamp(3rem, 1rem + 10vw, 4rem);`
- Added interactive elements like
 - Making the form usable with input and submit button that leads to thank you page
- Added animation to my headers
- Tested my site on chrome and safari from mac and phone
